# TECH AVYINA MOBILE LEGENDS: BANG BANG TOURNAMENT

*OFFICIAL COMPREHENSIVE RULEBOOK*

## 1. TOURNAMENT OVERVIEW & STRUCTURE

Welcome to the official competitive framework for the Mobile Legends: Bang Bang Tournament organized under Tech Avyinia at the National Institute of Technology (NIT) Nagaland. This document serves as the absolute baseline for rules, regulatory protocol, administrative powers, and fair play standards. All participants are legally bound to these clauses upon registration.

### 1.1 Hybrid Phase Mechanics

- Online Qualifiers: The preliminary operational stages spanning up to the Quarter-Finals will be managed entirely via online servers. Teams must coordinate remotely, providing their own hardware, network arrays, and stable utility connections.
- Offline Grand Finals Stage: The top four (4) remaining squads emerging from the online division will receive mandatory invitations to play live on-stage. The Semi-Finals, Third-Place Playoff, and Grand Finals will be hosted entirely on-campus at NIT Nagaland.

### 1.2 Definitive Offline Event Schedule

- Event Date: November 6, 2026
- Operational Window: 2:00 PM to 6:00 PM IST
- Venue: Designated Esports Arena / Main Stage, NIT Nagaland Campus

## 2. FINANCIAL ALLOCATIONS & EXECUTION THRESHOLDS

The prize configuration and financial overheads for the Tech Avyinia tournament are pre-allocated and guaranteed by the tournament treasury. Payout structures are non-negotiable and strictly dependent on placement standing.

### 2.1 Prize Pool Breakdown

| Placement | Cash Reward (INR) | In-game Diamonds |
|---|---|---|
| **1st Place (Champions)** | ₹20,000 | 5,000 Diamonds |
| **2nd Place (Runners-Up)** | ₹10,000 | 5,000 Diamonds |

### 2.2 Minimum Execution Threshold (Critical Clause)

***CRITICAL EVENT CEILING REQUIREMENT:***
***To ensure legitimate competitive standing, visual broadcast viability, and tournament execution validity, a strict minimum requirement of four (4) fully registered and checked-in teams is mandatory. If registrations fall below this 4-team baseline, the administration reserves absolute rights to cancel, defer, or modify the tournament matrix.***

## 3. COMPETITIVE LOGISTICS & OPERATIONAL GUIDELINES

To maintain continuity and strict procedural alignment with reference governance, Sections 3.1 and 3.2 are incorporated verbatim without modifications from original structural protocols.

### 3.1 Match Scheduling and Attendance

- Reporting Time: Teams must check in and report to their designated match hosts exactly ten (10) minutes prior to their scheduled match time.
- Punctuality Enforcement: Strict punctuality is required. Failure to report to the host by the scheduled match start time will result in an immediate forfeiture of the match and disqualification from the tournament.

### 3.2 In-Game Pause Rules

- Pause Allowance: Each team is permitted a maximum of two (2) pauses per match.
- Technical Issues: Pauses may only be requested for legitimate technical difficulties, such as severe device malfunctions or critical connectivity issues.
- Duration Limits: Teams must coordinate with the match host immediately upon pausing to state the reason and expected resolution time.

### 3.3 In-Game Conduct and Sportsmanship

- Trash-Talking Policy: Any form of toxic behavior, offensive language, slurs, or unsportsmanlike trash-talking in the in-game All-Chat or public broadcast channels is strictly prohibited. Spamming in-game features (such as the 'Recall' button or emotes) in a derogatory or provocative manner is also subject to penalty.
- Sanctions: Violations will result in a formal warning for the first offense, followed by a map forfeiture or full team disqualification for repeated offenses at the absolute discretion of the tournament administrators.

### 3.4 Competitive Integrity & Anti-Cheat Protocols

- Anti-Cheating Policy: The use of any third-party software, hacks, radar modifications, skin scripts, or known engine exploits that provide an unfair advantage is strictly prohibited.
- Piloting Restriction: Account sharing or 'piloting' (allowing a non-registered player to log onto and play on a registered player's account) is explicitly forbidden. Every registered player must operate exclusively through their own declared game account profile.
- Penalties: Any team found guilty of cheating, exploiting, or piloting will face immediate disqualification from the current tournament. Furthermore, the offending team and its individual members will receive a permanent ban from all future Tech Avyinia iterations.

## 4. COMPREHENSIVE MATCH MECHANICS & ENGINE RESTRICTIONS

Taking inspiration from official global professional esport standards, the following highly granular details govern standard match setups and roster tracking.

### 4.1 Lobby Generation & Match Parameters

- Game Mode: Custom Lobby - Draft Pick (5v5 Modern Custom Mode).
- Map Selection: The standard competitive layout (Imperial Sanctuary) must be used across all tiers.
- Server Regions: All matches default to South Asia / Indian regional servers. In the online segment, the host lobby location is finalized by the designated match admin to maintain uniform ping distribution.

### 4.2 Roster Structure and Sub-Registry

- Active Lineup: Each roster must contain exactly five (5) active starter players.
- Substitutes: A squad may register a maximum of one (1) designated substitute player. This substitute must be logged in the pre-tournament signup portal to be eligible.
- Mid-Series Changes: Roster swaps between active starters and the registered substitute are permitted only between individual games in a Best-of-X series. Swapping is forbidden once a draft phase initiates.

### 4.3 Disconnection, Reconnects, and Hard Remakes

- Standard Disconnect: If a player disconnects during active gameplay, their team must utilize their allocated pause count. The game will resume immediately upon the player rejoining or once the maximum administrative pause limit expires.
- Draft Phase Glitch: If a player disconnects or experiences a verified UI freeze during the Draft Pick phase, they must alert the match arbiter via external communications immediately. The admin may order a draft remake.
- Remake Draft Rules: In the event of a draft remake, both teams must identically replicate all hero bans and hero selections made up to the exact point of the technical failure. Any deviation results in instant map forfeiture.
- Game Remake Criteria: Hard remakes of a live match are only authorized within the first 60 seconds of gameplay, before 'First Blood' occurs, and exclusively for critical network server crashes that affect multiple participants.

### 4.4 Administrative Discretion and Final Authority

- Ruling Finality: Any technical scenario, dispute, match anomaly, or interpretation discrepancy not explicitly defined in this rulebook falls under the immediate purview of the Head Referee and Organizer Panel.
- No Appeals: All operational decisions, instant bans, or match adjustments rendered on-site or online by the Tech Avyinia administration are absolute and final.
