Tech Crisis – Rules & Regulations

Event name: Tech crisis

Organized by: E-Cell, NIT Nagaland

Event Overview

Tech Crisis is an exciting technical case study competition that challenges participants to think analytically, work collaboratively, and devise solutions to real-world engineering and technology problems.

Participants will be provided with a technical crisis scenario and must analyze the situation, identify issues, and develop a feasible, innovative, and technically strong solution within the given time frame.

This event tests creativity, teamwork, and decision-making – simulating how real engineers respond to challenging technological problems.

Team Formation

Each team must consist of up to 3 participants (solo participation is allowed).

The event is open to students of NIT Nagaland and other invited institutes.

Cross-institutional teams are not allowed – all team members must belong to the same institution.

Participants may be from different departments or years within the same institution.

A participant can only be part of one team.

Teams must register in advance under a unique team name.

Event Format

The event will be conducted in two structured phases:

Phase 1 – Case Analysis (1:30 PM – 2:30 PM)

Each team will receive a technical case study describing a real-world or hypothetical problem.

Teams must analyze the scenario, identify challenges, and prepare a written or slide-based solution within the given time limit.

The case will test technical knowledge, problem-solving ability, and innovation.

Phase 2 – Presentation Round (2:30 PM – 3:30 PM)

Teams will present their proposed solution before a panel of judges.

Each presentation should last 5–7 minutes, followed by a 2-minute Q&A.

Teams should clearly explain their approach, reasoning, and proposed implementation.

Time & Submission Rules

Teams must submit their presentation or report within the allotted analysis time. Late submissions will not be accepted.

All presentations must be submitted in the specified format before the presentation round begins.

Judging Criteria

Teams will be evaluated based on:

Problem Understanding – clarity in identifying core issues.

Innovation and Creativity – originality of the solution.

Technical Feasibility – practicality and soundness of approach.

Presentation and Communication – clarity, teamwork, and delivery.

General Rules

Cross-institutional teams are not allowed.

Teams must maintain professional behavior and respect event decorum.

Plagiarism or copied solutions will lead to immediate disqualification.

Judges' and organizers' decisions are final and binding.

The organizing committee reserves the right to modify event rules or structure if necessary.
