Integration Bee

The "Integration Bee" is a competition where participants' calculus skills are put to the test. They will be challenged to solve various integration problems, focusing on both speed and accuracy. This event offers an exciting opportunity for participants to showcase their mathematical knowledge and compete against other students

Objectives

The Integration Bee challenges students to master integral calculus through speed, precision, and mental agility. By competing without calculators under tight time limits, participants sharpen their problem-solving skills and prove their mathematical prowess in a high-stakes, competitive arena.

Rules and Regulations

1. The competition is open to all students.
2. The competition will have a maximum of 3 rounds, depending on the total number of participants registered.
3. Each round will have a fixed time limit, which will be announced before the start of the round.
4. There will be no communication between participants during the rounds.
5. Calculators, mobile phones, or reference materials are not allowed. Only pens, pencils, and provided answer sheets can be used.
G. Scoring:
   - Correct answers will be awarded full marks.
   - Negative marking will apply for incorrect responses/attempts.
   - Partial marks can be awarded for long-form problems where the steps are correct.
   - In case of a tie, additional integration problems will be given as a tie-breaker.
7. Any form of cheating or unauthorized assistance will result in immediate disqualification from the event.
